

Mr. Vladimir Marković

Born in 1979. Graduated from the Faculty of Political Sciences of the University of Belgrade in 2004, majoring in international relations. In 2007, at the Faculty of Political Sciences he completed the specialist post-graduate studies, with the paper on international relations and relations with the USA, and in 2012 he obtained the master's degree with the paper on EU integrations, majoring in Energy Community for South-East Europe.

Mr. Vladimir Marković has considerable professional international and national work experience as the consultant for development, project management and international cooperation, and power sector and mining sector are the two focus industries of his career. In addition to his academic education, Mr. Marković has improved his knowledge in the field of project management at the eminent organizations such as *European Public Affairs Institute Brussels*, *PricewaterhouseCoopers*, *London School of Public Relations*, and he also obtained Fidic certification.

Mr. Vladimir Marković started his career in 2005 at *the European Agency for Reconstruction*, where he was in charge of project management, and two years later he was the consultant for EPS TENT Project at the company *Doosan Power Energy*. From 2008 to 2010 he was the consultant for the development of the region of South-East Europe at the German company *TMG*, and from 2010 to 2011 he was the consultant for the project management for *Beočin Business Park* at the company *Lafarge*. In the period from 2011 until 2013, Mr. Marković worked as the project management consultant at the Austrian company *Asamer Holding* for the European Union region, Africa region, Arab region and particularly for the North Africa region. From 2013 until 2016 he was involved in the activities related to project management, investments and development at *Kolubara Mine Basin* within *Electric Power Industry of Serbia*.

From 2016 until 2021, Mr. Marković was the head of the Key Investment Projects Department and assistant director at Electric Power Industry of Serbia and he was the leader of the project management team. Mr. Marković successfully implemented several

modernizations and revitalizations at thermal and hydro plants and he has also initiated the construction of generation capacities and construction of environmental-friendly plants meeting environmental EU norms and simultaneously extending the lifecycle of generation capacities.

The team under his leadership has initiated several projects within new renewable energy sources, joint projects with the countries in the region, and they are credited for the expansion and business development of EPS in the region, and also for the future strategic projects significant for EPS and national energy security.

As of October 2021 he was appointed Executive Director for Strategic Projects Development at EPS.

He is fluent in English and Spanish.
