

Dragan Vlasisavljević

Born in 1958 in Pančevo, he graduated from the Faculty of Electrical Engineering, University of Belgrade, in 1982, where he also finished master studies in 1993.

He started his career in JUGEL in 1984 as a power system control and operation engineer, and then as a main engineer for electric power system analyses. As of 1994, he grew professionally in Electric Power Industry of Serbia as a main engineer for applicative SW and, afterwards, he became Assistant Manager for Technical System Management – CIIS.

In 2005, he became Assistant Manager in TSU Center of PE “Elektromreža Srbije” where he successfully implemented National Dispatching Center Project, a project of national interest, within a short time period. In 2006, he became PE EPS Electricity Trading Manager. His expertise reflected in managing specialist teams of engineers for implementation of IT system, establishing and improving business processes in the field of energy planning and wholesale of electricity.

He is a member of international technical association CIGRE, of the committee with the same name in Serbia, as well as of the European Federation of Electricity Trading - EFET.

In 2015, Dragan Vlasisavljević was appointed PE EPS Executive Director for Electricity Trading Affairs.
